What's Happening Week 15?

Wrapping it All Up

LAST CALL: If you have not yet submitted a Final Exam Question, please do that *today* . . .

This week we begin to wrap up the course, except, of course, for the Final Exam which will be available 12:01 a.m., Monday, 9 December 2024 – 11:59 p.m., Friday, 14 December 2024.

This week we'll briefly go to Hungary and have a look at their population problem—not enough children being born, which is becoming a problem worldwide. Hungary, with one of the lowest birthrates in Europe, is, in effect, paying people to have babies. . . .

And you'll have the opportunity to add your two cents worth as part of this week's Discussion.

And this week we're going speak about the unspeakable . . . about a topic tabooed to talk about worldwide . . . S###. And if you haven't already done so, check out the World Food Clock (including food waste, water, and Tree Loss Clock).

After that, the end is in sight.

Another focus this week is having a look at your colleagues' Presentations. Yes, this week we get to see the crown jewels of the semester—your presentations.

Live chat as usual on Tuesday evening, 7:00, to answer all of your unanswered questions.

Bill Gates

“Human waste, one of the last big ‘taboos’ in today's global society, no matter the country, culture or race, is now becoming more accepted as part of the worldwide conversation thanks to the current environmental crisis. Every day, a single person produces one liter of urine and 200 grams of feces, which will need an average of 6 to 10 liters to flush away. On a planet with eight billion people, that translates into millions of tons of waste. Many might not be aware that a ‘toilet revolution’ is taking place on the planet today. It has become evident that we need to make significant changes in how we handle, manage and even talk about human waste.”

“Bill Gates, the co-founder of Microsoft, has been involved in improving access to toilets and sanitation in developing countries. He launched the global ‘Reinvent the Toilet Challenge’ in 2011 to create new technologies for producing safe and affordable sanitation solutions in areas without access to traditional sewage systems.”

“In many parts of the world, especially in developing countries, people do not have access to safe and hygienic toilets, which can spread diseases such as diarrhea, cholera, and typhoid. These diseases are a leading cause of morbidity and mortality, particularly among children, and they disproportionately affect the poorest and most vulnerable populations.”

“Through the ‘Reinvent the Toilet Challenge’, the Gates Foundation has funded research and development projects at universities and institutions worldwide to create innovative toilet designs that use alternative methods for treating and managing waste. These efforts have resulted in several prototypes, including toilets that use solar power and other renewable energy sources to treat waste on-site and toilets that convert waste into useful products like energy, fertilizer, and clean water. There is also a project to try and remove ‘toilet stink’ by

analyzing human waste smells at a molecular level to try and alter anything unpleasant.”

“The movie also touches on how a major shift in treating human waste is needed as soon as possible. Sewage is mainly treated in centralized facilities that are costly to build and maintain. They often have a negative impact on the environment, including water pollution and greenhouse gas emissions. Developing affordable, sustainable methods for managing human waste can significantly reduce these impacts and improve people's overall quality of life worldwide.”

Your Term Paper

If you haven't received your Term Paper back with my comments, you should be receiving it shortly. It takes quite a while to read those and make careful and extensive comments on them, so please be just a little patient.

In the next two weeks I get to read and evaluate several hundred final exams, term papers, forum postings, and final projects. As you can imagine, that takes quite a bit of time—so have patience. I'll be working at them pretty much continuously for the next two-and-a-half weeks. But, having said that, if you have any questions about any of those, please feel free to e-mail: <mailto:troufs@d.umn.edu>.

REM: Course Survey
(from IT, if you haven't yet completed it)

The friendly folks from Information Technology Systems & Services will be sending you an Invitation and Reminder to Participate in an online Course Evaluation.

Evaluations are important to me, the Department Head, and the Dean, as well as everyone in our Department.

Please fill the online Course Evaluation out carefully.

Evaluations are anonymous and will not be seen by the instructor until final grades for this course have been recorded.

Thanks,

Tim Roufs
