

# **Journal Article Presentation**

## **Introduction:**

**Title:**

**Theory:**

**Hypothesis:**

**Theoretical Construct I:**

**Corresponding Operational Definition:**

**Theoretical Construct II:**

**Corresponding Operational Definition:**

## **Design:**

**Study (Experimental or Quazi-Experimental):**

**Subjects:**

**Independent Variable I:**

**Scale of Measurement:**

**Levels of Independent Variable I (If Qualitative):**

**Independent Variable II:**

**Scale of Measurement:**

**Levels of Independent Variable II (If Qualitative):**

**Dependent Variable I:**

**Scale of Measurement:**

**Dependent Variable II:**

**Scale of Measurement:**

## **Results:**

**Main Effect I (Of First IV):**

**Main Effect II (Of Second IV):**

**Interaction (If more than one IV):**

**Discussion (This is what YOU, not the Authors, think of the study):**

**Did the Operational Definitions Correspond well to the Theoretical Constructs?**

**If the results were significant, did they have a big effect?**

**What are the Potential Confounds?**

**Do you agree with the Authors?**

**How would you have done the Study differently?**

**Even if you are completely happy with the Study, what would you do next?**
